Software: Visual Studio, npm, Angular CLI, TFS, Git, SSMS, IIS

Employment History

Front-End Software Engineer   **December 2019 – Present**
Logistics Health Incorporated   **La Crosse, WI**

Lead the front-end development (Angular) on multiple projects. I was an integral piece to standing up a COVID-19 testing website which has been used by California and other states. Work closely with product owners, business analysts, and designers to roadmap features and solve for poor user experiences. Collaborate with other front-end developers to maintain our in-house component library.

Software Developer   **November 2017 – December 2019**
Logistics Health Incorporated   **La Crosse, WI**

Develop and maintain 4 Angular applications. Offer performance enhancement suggestions to the lead and help mentor others on front-end best practices.

Software Engineer   **July 2015 – November 2017**
Marketsharp   **La Crosse, WI**

Develop and maintain Web Forms applications written in C# and Javascript. I lead an initiative to integrate Angular 2+ into one of our .NET applications. I would help design, implement, and support features with various people throughout the company.

Education: **Associate's Degree in Web and Software Development** (2011-2013)
Western Technical College – La Crosse, WI
